Message from the Organising Chairman

On behalf of the Organising Committee, I would like to invite all of you to participate in the **9th Asean Conference on Primary Health Care**. The Committee has worked diligently in ensuring the success of the Conference and its scientific programme with the intention to match the standards of the international scientific faculty. We have taken into consideration the needs of the primary care doctors and paramedics and also other specialists, with the prospect that they will benefit from the topics related to their disciplines.

This Conference is crafted with great effort to meet the needs of the primary care providers and its auxiliary health care providers. The topics of the scientific programme were carefully chosen based on their importance in day-to-day practices. We hope that it will be of help to all the delegates to remain abreast with medical breakthroughs, advancements in medical technology and the ever changing needs of the patients.

The theme of this year's Conference, **"Primary Care for All Ages"**, stresses the importance of primary care in our daily practice and we hope that the health care providers will be inspired to serve their patients with excellence, expertise and foresight, striving to achieve mastery. I hope this conference will instill in the delegates the ethics of applying good evidence-based knowledge relevant to their clinical practice.

Last but not least, please register yourself for this Conference. It will definitely be a good way to make new friends, to meet old friends and renew acquaintances and to enjoy the delights of Ipoh city which is well known for its scenery and good food.
